Richard Huang:

Worked on some HTML, CSS, Database, login details, report

Jeffrey Huang:

Worked on some HTML, CSS, Database, login details

NOTE

Basically we did a lot together talking with each other and knowing what the other is doing. We worked on this in a discord call and used the extension Live Share Extension Pack from VS Code that allowed both of us to join a session and work on the code like a google doc. We can also look at the same website server. We looked at each others code and improved in parts where we think can be adjusted.

Features that were included

- Login
- Signup
- Improved Navigation Bar
- Better CSS
- No more unneeded duplicate CSS files
- Grades Remark
- Feedback

Features not included

- Navbar dropdown does not work for mobile
- Some small details that could make the appearance better like alignment and bolding of words
